

LET'S START OFF ON THE RIGHT FOOT.

Not exactly Miranda Rights, but here we are, it's how I like doing business.

MY SIDE AND MY LITTLE BUSINESS

We all have competitors, myself included, and mine are spread across the globe, all scrambling like seagulls fighting over scraps at a McDonald's bin.

One thing I've noticed is that they all seem obsessed to know your advertising budget, and you'll often have to sift through endless pages on their websites just to get a rough idea of what they charge - it's frustrating.

I keep it simple: **£17.50** for an advert and **£60.00** for a video. I only work with small businesses, so being straightforward and transparent makes everything easier. I don't have any overheads or staff to pay, so it's just straightforward pricing with no fuss.

All I will need from you is excellent-quality high-res logos and pictures of your products, so use an iPhone or similar set to HD to get the optimum results; it's not difficult to do. Remember the old adage 5hite 1n 5hite Out?

I also make smart, nice, clean informative websites and one like mine would only be around **£700** and you must agree that's a lot of website for the money - oh, and I do take a deposit of £200

LET'S TALK MONEY - YOUR SIDE

When I complete anything for a client, I get paid immediately with no 30-day nonsense. You will see a rough image blurred out - just sign off on it and I'll send the perfect completed version to you as soon as your shekels hit my shekels - just straightforward business with no fuss and it's now your property

Now, let's create some amazing things to enhance your business appeal, taking it a step further than it was last week.

That's it - no extremes, no nonsense dealing with me. I only work with small businesses, as the big guys are a total pain. Everything is in a hurry, and there's no time to do it unless they have arsed something up, then they always magically find more time.
